

Tactical FPV Drone Operator Training

A comprehensive 14-day programme that takes operators from foundational FPV theory through to live flight operations and tactical mission execution. Designed for military and security personnel, this course combines simulator training with real-world flight exercises to build confident, operationally ready FPV pilots. Participants gain proficiency in manual flight control, mission planning, and emergency response procedures under realistic operational conditions. The curriculum is structured to accommodate both beginners and intermediate operators, with progressive skill-building modules that culminate in a live flight evaluation and final assessment. Small class sizes of 5-10 participants ensure individual attention and ample flight time for each trainee.

Programme Details

- **Participants:** 5-10
- **Duration:** 14 Days
- **Level:** Beginner / Intermediate
- **Language:** TR / EN
